### Personal Statement:

I am really focused on software development and its security over its platform from an engineer's view. Patience is my power and I try my best to understand today's requirement to keep myself updated. Now I am looking for an opportunity in the field of Software Engineering & Data science to build my career as a Java programmer.

### Personal Qualities & Strength:

- Presentation skills
- Communication skills in written and verbal both
- Quick learner
- Able to give the best result in pressure situation
- In-depth knowledge of Database Techniques, Data Structures & Algorithm.

### Core Technical Skills:

- Programming language: C, Java, PHP.
- Web: HTML, CSS, BOOTSTRAP (basic).
- Database: MySQL, Hadoop, Apache HBase.
- Operating Systems: Windows, Linux.
- Knowledge of JSP, JavaFX & Tomcat (basic).

### Project:

I have done some web-based database projects in **PHP** like "Lottery Checking", "Charity Fund". Where "Lottery Checking" finds the winner and "Charity fund" shows the donor and keeps track of their donation.

Alongside normal calculator, I have built calculator in **Java** which computes Fuzzy calculations

Developing a Framework for Analyzing Heterogeneous Data from Social Network was my final year project. Here I have analyzed heterogeneous data from a social network by using **NoSQL** in Big-Data platform. The language I have used is core **Java** & the platform is **Hadoop**.

## **Education:**

Chittagong University of Engineering & Technology  
(2013-2017)  
B.Sc. in Computer Science & Engineering.  
Grade: CGPA 3.38

Bir Shreshtha Noor Mohammad Public College, Dhaka  
(2011-2012)  
Higher Secondary School Certificate.  
Grade: GPA 5(in all subject).

Madhabdi S.P Institution, Narsingdi .  
(2009-2010)  
Secondary School Certificate  
Grade: GPA 5(in all subject)

## **Interests:**

Big data, Data mining, Software development, IOT.

## **Training:**

I have an Industrial attachment in Synesis IT, Dhaka for 15 days.
